

WEB DEVELOPMENT PORTFOLIO

C2 – Team Communications Platform

Full-stack Discord-style web application inspired by military communication software like ATAK. Features real-time messaging, user authentication, and responsive UI.

Stack: **Next.js 13, React, Socket.io, MySQL, Prisma, Clerk, Tailwind CSS**

Romans Road – Frontend Web App

A workout regiment web app inspired by Roman legionaries, focused on bodyweight training and weighted rucks. Built in Vue.js with custom “ManuCSS” styling for a worn, aged Greek manuscript aesthetic.

Stack: **Vue.js, Tailwind CSS**

Dev Portfolio Template – Open Source

A GitHub repository providing a customizable developer portfolio template. Users can easily plug in their own data, images, and content.

Stack: **Vue.js, Tailwind CSS**

OTHER PROJECTS

nvSIL – macOS App

A faithful Apple Silicon replica of nvALT (successor to Notational Velocity). Built natively in Swift using Storyboard UI.

Language: **Swift**

BREASTPLATE – Tactical Survival Game

Hyper-realistic tactical survival looter shooter set in an apocalyptic world. 3/4 perspective with focus on small unit tactics, CQB, and team-based gameplay. Supports local multiplayer hosting.

Stack & Tech: **Godot (GDScript), C#**
